If the radius of a circle is 20 cm, what is the circumference?

$$C = \pi d$$
$$C = \pi \cdot 40$$
$$C = 40\pi$$

If the perimeter of a square is 40, what is its area?

Give the equation that is \perp to $y = \frac{1}{2}x + 3$ and goes through $(2, 7)$.

$$y - y_1 = m(x - x_1) \quad \perp m = -2$$
$$y - 7 = -2(x - 2)$$
$$y - 7 = -2x + 4$$
$$\begin{array}{r} y - 7 = -2x + 4 \\ +7 \quad \quad +7 \\ \hline y = -2x + 11 \end{array}$$

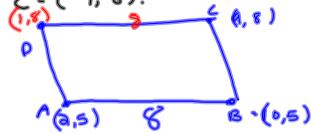

$\vee \rightarrow$ or

$\wedge \rightarrow$ and

ABCD is a parallelogram.

$A = (2, 5)$ $B = (10, 5)$

$C = (9, 8)$. Find D.

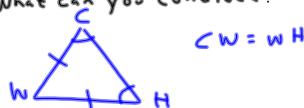

Give equation \perp to $y = -2x + 1$

$$y = \frac{1}{2}x + \square$$

Linear pair

Vertical \angle 's

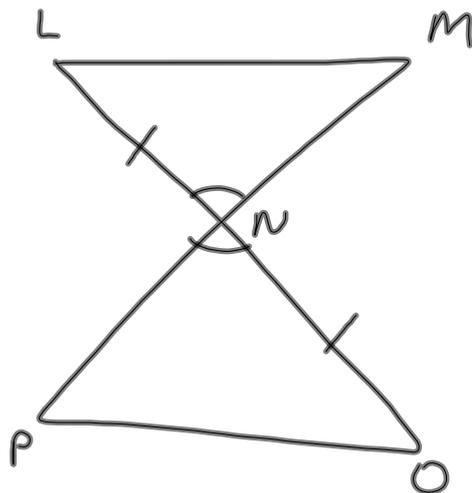

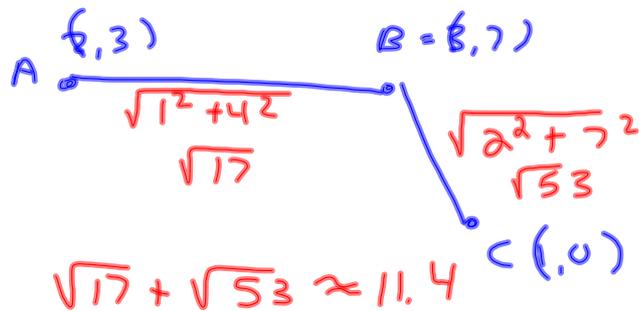

In $\triangle CWH$, $\angle H = \angle C$.
What can you conclude?

Give slope from $(1, 7)$
to $(-1, 17)$.

$$\text{slope} = \frac{\Delta y}{\Delta x} = \frac{17-7}{-1-1} = \frac{10}{-2} = -5$$

$A = (2, 3)$ Find distance
 $B = (3, 7)$ from A to B
 $C = (1, 0)$ then to C.

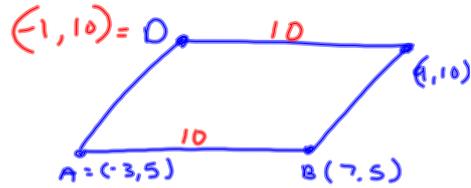

What must be true to
prove $\triangle LMN \cong \triangle OPN$ by
ASA $\angle L = \angle O$ AAS $\angle P = \angle M$

ABCD is a parallelogram
with $A = (-3, 5)$ $B = (7, 5)$
 $C = (9, 10)$. Where is D?

In $\triangle ABC$, $AB = BC$.
Which angles must be equal?

Give the equation that
goes through $(2, 4)$ and
is \perp to $y = -2x + 1$.

$$m = -2$$

$$\perp m = \frac{1}{2}$$

$$y - y_1 = m(x - x_1)$$

$$y - 4 = \frac{1}{2}(x - 2)$$

$$y - 4 = \frac{1}{2}x - 1$$

$$\begin{array}{r} y - 4 = \frac{1}{2}x - 1 \\ +4 \qquad -1 \\ \hline y = \frac{1}{2}x + 3 \end{array}$$

Which is a possible isosceles

a.) $2, 2, 5$ $\overset{\curvearrowright}{0} \rightarrow 4$

b.) $4, 4, 7$ $\overset{\checkmark}{0} \rightarrow 8$

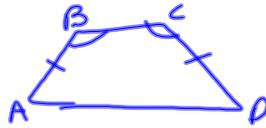

c.) $6, 6, 12$ $\overset{\curvearrowright}{0} \rightarrow 12$

d.) all are isosceles

Find the slope between
 $(-1, 2)$ and $(1, 12)$.

$$\text{slope} = \frac{\Delta y}{\Delta x} = \frac{12 - 2}{1 - (-1)} = \frac{10}{2} = 5$$

In isosceles trapezoid
 $ABCD$, $AB = CD$. $\angle B$
 must be congruent to $\angle C$.

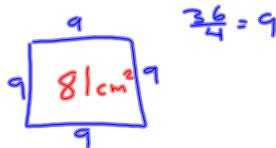

If radius of a circle
 is 10 cm, what is the
 circumference?

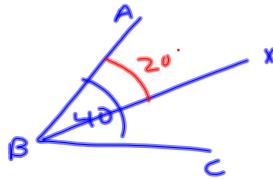

$$C = \pi \cdot d$$

$$20\pi$$

What is the area of a
 square whose perimeter
 is 36 cm?

\overrightarrow{BX} bisects $\angle ABC$.
 If $\angle ABC = 40^\circ$, what is $\angle ABX$?

$$A = (1, 2) \quad B = (3, 5)$$

$$C = (4, 10).$$

If I drive from town
 A to B and then to
 town C, how far have
 I traveled?
