Oral questions, so pay attention

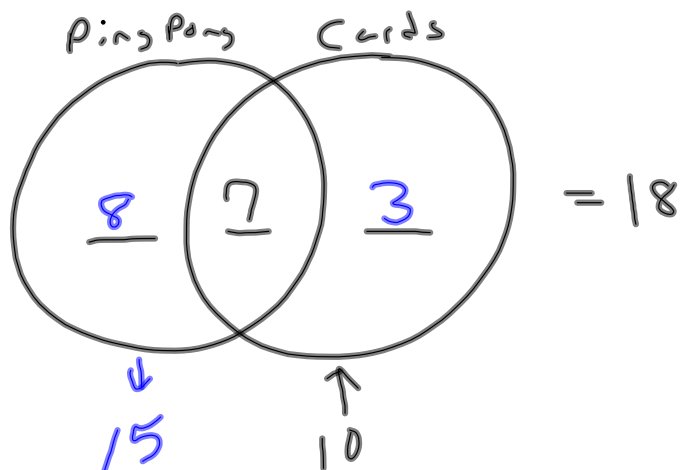

I have 20 kids in my room who play chess or tennis. Of the 20, 6 do both sports. If there are 14 tennis players, how many do chess? 12

I have 10 kids. All play either hopscotch or jacks.
 If 8 play jacks and 5 play hopscotch, how many play both?

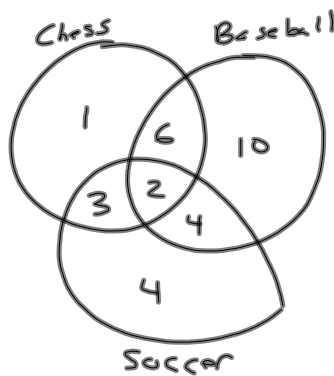

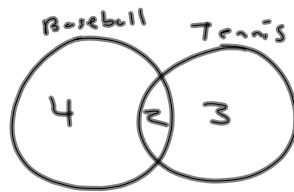

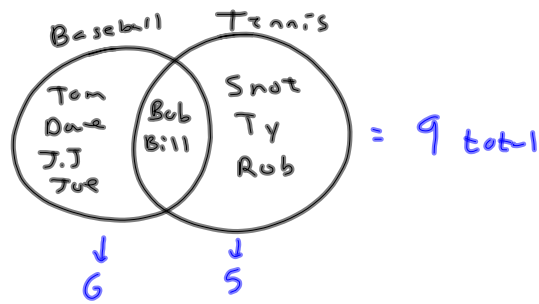

Of the 18 kids in my class,
 7 play both ping pong and cards.
 If everyone plays one or the other
 and there are 10 who do cards, how
 many play ping pong? 15
