## Jefferson Labs - http://education.jlab.org/solquiz/index.html

At this site, you should check the box for 20 questions and the Geometry box. This site has over 400 questions, so each time you do a set of 20 questions, you will get new questions, though you might get one or two that are the same. If it does keep repeating the same 20 questions, you need to see me and I will show you how to fix the problem.

Make sure that when you sign it, you use your first and last name. You can do this site as many times as you like. The most points you can earn is 20 points. You must score $70 \%$ or higher on any of the tests in order to earn points. You will be given whatever percent you earned on the test multiplied by 2. For example, if you scored $80 \%$ on one of the tests, you will get $.8 \times 2=1.6$ bonus points.

When you finish a test, you must email it to mathintheusa@gmail.com and you must record the required information on the sheet below, which will be due on or before May 18.

| Date | Total Time <br> spent on test | Difficulty 1-10 <br> 1-easy 10-very difficult | Percent Correct |
