## Geometry Chapter 4 Test Practice Test 3

Name $\qquad$
Consider each of the triangles below. Circle all that apply to the triangle.

Triangle A

1. Acute
2. Acute
3. Acute
4. Acute
5. Acute

Triangle C

Scalene Isosceles Equilateral
Scalene Isosceles Equilateral
Scalene Isosceles Equilateral
Scalene Isosceles Equilateral
Scalene Isosceles Equilateral

Triangle D

Given that $\Delta N O P \cong \triangle B X D$ match the line segment or angle that is congruent to the given line segment or angle.
A. $\overline{B X}$
B. $\overline{X D}$
C. $\overline{B D}$
D. $\angle B$
E. $\angle X$
6. $\overline{O P}$
7. $\angle O$
8. $\overline{N O}$
9. $\overline{P N}$

Let the following be true: $\triangle A B C \cong \triangle X Y Z, \mathrm{AB}=8, \mathrm{BC}=10, \mathrm{AC}=11$.
$\qquad$ 10. If $\mathrm{ZX}=2 \mathrm{n}-1$, what is the value of n ?
$\qquad$ 11. If $X Y=2 n$, what is the value of $n$ ?
12. If $\triangle R S T \cong \triangle H I J, \angle R=97^{\circ}, \angle J=37^{\circ}$, and $\angle S=4 x+14$, what is the value of x ?
13. $\mathrm{R}, \mathrm{S}$, and T are the verticies of one triangle. $\mathrm{E}, \mathrm{F}$, and D are the verticies of another triangle. $\angle R=60^{\circ}, \angle S=80^{\circ}, \angle F=60^{\circ}, \angle D=40^{\circ}, R S=7$, and $E F=7$ Which postulate would let you conclude that the two triangles are congruent?
A. ASA
B. SSS
C. AAS
D. SAS

Figure 3

Figure 6

14. In figure 1 , what is the measurement of $\angle B$ ?
15. In figure 2, what is the measurement of $\angle M X N$ ?
16. In figure 3 , what is the value of $n$ ?
17. In figure $4, \overline{A B} \cong \overline{C B}$ and $\overline{B N} \cong \overline{B P}$.

Which could be used to prove that $\triangle B N A \cong \triangle B P C$ ?
A. AAS
B. SAS
C. ASA
D. SSS
18. In figure 5, what two postulates could prove that the two triangles are congruent?
A. SAS and AAS
B. ASA and SAS
C. ASA and SSS
D. ASA and AAS
19. In figure 6, what else must you know to prove that the triangles are congruent by ASA?
A. $\angle B D C \cong \angle A B D$
B. $\angle B D C \cong \angle B A D$
C. $\angle D C B \cong \angle B A D$
D. $\angle A D C \cong \angle B C D$
20. Give the equation in slope intercept form that goes through $(2,9)$ and is perpendicular to $\mathrm{y}=1 / 2 \mathrm{x}+10$.
